

100% SOLID CLEAR EPOXY BINDER WITH UV RESISTANCE

DESCRIPTION

MAGIECHEM 9256 is a two-component clear epoxy binder with a 100% solid content and self-leveling, specially designed to be used as a binder for a decorative aggregates and Quartz.

MAGIECHEM 9256 is a very strong epoxy binder providing a better resistance to ultraviolet rays (UVA and UVB) compared to the other existing epoxy binder in the market.

MAGIECHEM 9256 can take up to 14 kg of aggregates (32mesh) per liter of resin, without sticking to the trowel during the application.

MAGIECHEM 9256 has excellent penetration in most substrates especially to concrete and wood, which allows excellent adhesion.

ADVANTAGES

- Excellent surface wetting.
- Low viscosity (No diluents added).
- Good adhesion to concrete and other.
- Meets LEED requirement

INSTALLATION INSTRUCTIONS

The surface must be dry and free of oil, grease, wax, curing compounds, rust and other contaminants.

PRECAUTIONS

- Consult MSDS before use.
- Can be applied down to 5°C (41°F).
- Not applicable on a wet concrete, red with a scale Delmhorst or when the percentage of moisture in the concrete is higher than 4%
